Hadhramaut, Yemen — Open to remote or relocation

Profile

Full-Stack developer with hands-on production experience since 2024. Built Daleel, a content and learning platform, from scratch and continue to evolve it, with multi-level permissions and 136 automated tests. Comfortable across the stack, from UI to database and deployment, and use AI tools to ship faster. Looking for a role on a product team building real software.

Technical Skills

Front-End:

React · Next.js · Tailwind CSS · HTML/CSS

Back-End:

Node.js · PHP · REST APIs

Databases:

PostgreSQL · MySQL · Supabase · Firebase · SQL Server

Hussien Alkhateeb

Full-Stack Developer

> React · Next.js · Node.js · PostgreSQL — building products from scratch to production, internal systems, and AI-driven automation.

Selected Work

Systems & Sites

Daleel — Content & Learning Platform

A WellTech product | daleel.welltech-gl.com

React · Next.js · Node.js · PostgreSQL

- **One content library working in two directions:** a file is uploaded once, then sent to a client as a proposal and used internally as a training lesson.
- **Tracked sharing links:** who opened the file, which page they read, and how many seconds they spent on each — with replies sent from inside the link itself.
- **Training for employees and external trainees:** the same files become sequential lessons, with isolated trainee accounts, cohorts, self-registration links, completion tracking, and automatic certificates.
- **Permissions & quality:** six permission levels with per-department folder access, 136 automated tests, and a critical privilege-escalation vulnerability resolved before launch.
- **Ongoing development:** built from scratch, launched, and still evolving: from an internal LMS, to content management and sharing, to training external trainees.

WellTech — Website & Admin Dashboard

welltech-gl.com

React · Next.js · Node.js

- Full build and ongoing management, with a **custom admin dashboard** for updates and monitoring.
- Owned the infrastructure, hosting, and deployment pipeline.

Jebaya — Custom WordPress Theme

jebaya.com.sa — Saudi debt recovery, legal consulting & HR firm

WordPress · PHP · JSON-LD

- **Theme built from scratch** with no page builder, including bilingual RTL/LTR routing.
- **Custom admin dashboard** with CSV data export.
- **Dynamic JSON-LD engine** for structured-data SEO.

MrourCare — Traffic Appointment Booking

Graduation Project | March - June 2024

- Appointment scheduling system with request tracking and automated email and SMS notifications.

WordPress:

Custom Themes | WooCommerce | RTL/LTR

Automation & AI:

n8n | Claude Code | Prompt Engineering | Google AI Studio | Antigravity

One Million Prompters — Dubai Future Foundation.

AI Workshops (2026)
LLMs & RAG · Agentic software development · AI-powered UI/UX.

Coursera (2026)
WordPress website & business blog · Canva visuals.

Cisco Networking Academy (2024)
OS basics · Computer hardware basics.

Experience

Tech & Automation

Founding Team Member & Developer

WellTech | 2025 - Present

- Build the company's technical products, led by the Daleel content and learning platform.
- Contribute to product decisions, technical architecture, and quality standards.

IT Specialist & Web Developer (Remote)

Bit-EST & FCL Laboratory | 2025 - 2026

- **Web development & management:** redesigned the company and lab websites, built seasonal offer pages, and managed hosting via cPanel.
- **Process automation (n8n):** built workflows for recruitment and contact processes integrated with Google Sheets, plus automated electronic signatures.
- **SEO:** optimized all pages and built an automated system to generate and publish articles on a schedule.
- **Internal systems:** supervised PayMob payment gateway integration and initiated a comprehensive HR and task management system.
- **IT support:** resolved daily system issues and trained new employees on internal tools (Showell).

Freelance Web Developer (Side Projects)

Clients and companies in Saudi Arabia and Yemen

- Deliver complete websites and systems, from design through hosting and post-launch maintenance.
- Manage domains, business email, and hosting on behalf of clients.

Education & Achievements

Academic

BSc in Information Technology - Network Pathways

Seiyun University | July 2019 - June 2024 | Grade: Very Good

AI Challenge Serving Islamic Content

Participant, remote hackathon | October 2026 | Certificate of Appreciation

- Developed AI-powered technical solutions serving digital Islamic content.
